

## INSTALLING INTRANET WITH PostGreSQL (included)

### Installing IntraNet

If at any time you are unhappy with options you have chosen during the installation process, you may select 'Back' to review and change any options you have chosen, or press 'Cancel' to escape the installation process completely.

#### 1. End User License Agreement

Read over the terms of the License Agreement and click 'Yes' when you are ready to continue.

#### 2. Customer Information

In the text areas provided, enter your user name and company name. You may also specify if IntraNet is to be available to all users. This is important if you are using a shared computer. If you wish the IntraNet software to be available to yourself only, click the lower radio button marked 'Only for Me (username)'. If you wish to make the IntraNet software available to all users, you may leave it at the default as shown below:

The screenshot shows the 'InstallShield Wizard' dialog box with the 'Customer Information' tab selected. The dialog has a blue title bar with the text 'InstallShield Wizard' and a close button. Below the title bar, the text 'Customer Information' is displayed, followed by the instruction 'Please enter your information.' There are two text input fields: 'User Name:' with the placeholder text 'Your Name' and 'Company Name:' with the placeholder text 'Your Company Name'. Below these fields, the text 'Install this application for:' is followed by two radio button options: 'Anyone who uses this computer (all users)' (which is selected) and 'Only for me (stu)'. At the bottom of the dialog, there are three buttons: '< Back', 'Next >', and 'Cancel'. The 'InstallShield' logo is visible in the bottom left corner of the dialog area.

When you are satisfied that this information is correct, click the 'Next' button to continue.

### **3. Choose Destination Location**

IntraNet is set by default to install to c:/Program Files/IntraNetVX/, X signifying the version of the software that you are installing. If you wish to install IntraNet at a different location, click 'Browse' and select a new location for IntraNet. When you are satisfied with the location for IntraNet installation, click 'Next' to continue.

### **4. Database Server**

This is where you will choose what type of database will be used by the IntraNet software. Select the 1<sup>st</sup> radio button, marked 'PostGreSQL', and click 'Next' to continue.

### **5. IntraNet Port Number**

This should be set as default to port 80. If you wish to install IntraNet on another port, please specify which port you wish to use in the area provided. Please ensure that no other web services are on the port on which you wish to run the IntraNet software. Click 'Next' when you are ready to proceed.

### **6. Multiserver Admin Password**

This option allows you to set the password for IntraNet's diagnostic support tool and is required to continue the installation process. Click 'Next' when you have entered a password and are ready to continue installation.

### **7. Start Copying Files**

This section allows you to review the options you have chosen for your IntraNet installation. If you wish to change any of the settings shown, use 'Back' button to return to the appropriate section. When you are satisfied with the parameters that will be used, click 'Next' to begin installation.

You will now be required to restart your machine to complete installation.

### **8. Database Pre-Load**

Double clicking the 'intraNET V5 Login' icon will take you to the 'Database Preload' screen. Here you will be prompted to enter the license key. Simply copy and paste the 2nd line of the 'license\_key.txt' file into the indicated text area and click on 'Begin Database Preload' to begin the installation of the PostGreSQL database. You should then see a white screen with intraNET X.X.X Preload status, with X.X.X indicating the version of the software. After completion, you should see a number of completed tasks

appear, along with a corresponding date and time. The username and password should be displayed at the top of the page, along with a link to the intraNET.

You have now successfully installed IntraNet with PostGreSQL.
